QoS Testing Experts

## BRINGING OUR EXPERTISE TO THE FAST EVOLVING SERVICE TESTING ENVIRONMENT

Since 1989, Ibys Technologies is present in the Telecommunications Arena supplying leading QoS Testing Solutions. In 1994 it pioneered Automated End to End Service Testing for Telecom Operators. Our Mission is to assist our customers in supplying greatly improved data and voice services by objectively enhancing the end-user experience, and in the process, generating a higher degree of satisfaction and greater use of available services. In the ever growing Telecommunications Industry and rapid development of Services, our focus is on customer needs by being at the forefront of QoS, bringing our expertise to provide leading edge QoS testing solutions for present and future challenges.

### VISION

To become a world reference and market leader by providing superior QoS solutions.

### MISSION

To help Telecom Operators supply greatly improved data and voice services by objectively enhancing the end-user experience, resulting in a higher degree of satisfaction and a major use of available services.

### BACKGROUND

Innovative Spanish company offering advanced, stable, proven solution for the telecom sector. From the very beginning, Ibys aims to distinguish itself through its progress in technological innovation, increases in the breadth of its products and service offering.

First Spanish company in developing QoS systems for the wired and wireless universe: ISDN, PSTN, GSM, EDGE, GPRS, UMTS, Wimax.

Since 1.989 working to provide tools that Telecom Operators and Service providers need to control their products and services.

## BUSINESS SEGMENTS

### QoS TESTING

The main activity of Ibys is focused on design, manufacture and commercialization of measuring systems and equipment. Ibys is a world leader in quality of services (QoS) systems for the telecom industry.

### CONSULTING

Ibys Technologies provides a broad set of Consultancy Services to the Telecom Operator. Our expert team can provide a guidance before installing our Solution by Identifying the exact needs of the customer. In addition to those facts, Ibys comprehends the important role played by the economical part of this business, and it's in the position to help its customers understand and enhance ROI issues, by allowing them to quickly perceive the benefits and advantages of their investments.

### DEVELOPMENT

Our expertise in OSS integration and the flexibility of the Xplorer System enables us to provide to our customers best fit Integration with their existing OSS Solutions. On the other hand, it is known that, some customers prefer to develop their own scenarios, some others request development of specific features; we perform all these adaptations thanks to our highly skilled R&D Team, and in close collaboration with our customers

### OUTSOURCING

Operators can decide either to invest and run their own System, or outsource the QoS tasks to Ibys Technologies, or even acquire the System and let Ibys manage it. All options are possible. We understand each customer has its own priorities and we offer Flexible Business Model in all our Services.
